

SAMUEL BARBIERI

JUNIOR WEB DEVELOPER - FULL STACK

PROFILE

Junior Web Developer, trained through a hands-on master's program focused on real-world projects. Highly motivated to expand skills, learn from experienced colleagues, and make a tangible contribution to delivering high-quality solutions.

HOBBIES AND INTERESTS

Craftsman at heart, I find fulfillment in designing and developing projects of various kinds, including small applications, games, woodworking, and other DIY activities. Also passionate about gardening and canine care/training.

EDUCATION AND TRAINING

START2IMPACT UNIVERSITY

Master in Full Stack Development | 2022 - 2025

Intensive, self-directed training in front-end and back-end technologies, as well as deployment platforms, including both theoretical and practical assessments supervised by senior professionals. Developed real-world-inspired projects such as: a tech news portal; an urban collaborative platform; a REST API for order/product management; and an application enabling note-sharing between patients and psychologists, featuring JWT authentication, strong security measures, and a focus on usability.

Projects available at: <https://github.com/LonneWW>

Front-end	HTML · CSS · SASS · JavaScript · TypeScript · Angular (Material) · Bootstrap · Responsive Design
Back-end	PHP · Node.js · MySQL · REST API · JWT
Tooling & Build	NPM · CLI · dotenv · Webpack · Composer · Postman · DB Beaver · Wamp64
Deployment & Hosting	GitHub Pages · Netlify · Render · Railway · Firebase (Hosting/Auth/Realtime DB)
Versioning	Git · GitHub

WORK EXPERIENCES

MOLLIFICIO LECCHESE

Oil Treatment Department Operator | September 2021 - December 2021

Handled processing, packaging, and movement of springs while ensuring compliance with deadlines and quality standards. Provided frequent support to related departments including heat treatment, furnaces, grinding, warehouse, and quality control.

SYNLAB LECCO

Front Office | Febbraio 2022

Welcomed and assisted patients, performed temperature screening, and managed incoming flow in compliance with regulations in place during the public health emergency.
